

# LOVE Reports

## Sunflower Assets Reports: New List of Values Enhanced (LOVE) Reports

Sunflower Systems is pleased to release List of Values Enhanced (LOVE) Reports for Sunflower Assets. This exciting functionality includes:

### Lists of Values for Report Parameters

Lists of Values allow you to search for and select specific values for your fields rather than simply typing in the data. By reducing the number of key strokes required to run reports, users will save time and reduce errors.

Identifiers and Attributes	Catalog	User Fields
Manufacturer	DELL INC.	
Model	GX270	
Model Name		
Official Name	LAPTOP	
Asset Type Category	PERSONAL PROPERTY	
Asset Type	AUTOMATIC DATA PROCESSING AND TELECOMMUNICATIONS	
National Stock Number		

### Improved Navigation

**Menu Bar** – Navigate the report features more easily using the various Menu Bar buttons. These are reorganized into four main areas: Parameters, Display Options, Sorting and Grouping, and File Output.

**Parameter Tabs** – Find and enter your parameters in a more organized fashion using the new tabular format.

### Simplified Review of Report Criteria

Review only the parameter information that you used to run the report, rather than all of the available parameters. This allows users to review the report criteria in a single form without the need to scroll through blank parameters. This feature provides a faster review process to ensure your report will contain the information you need most.

Sunflower LOVE Reports can be downloaded from our Customer Care site as part of Patch 278. Once the patch is installed, customers will have the option to deploy the LOVE Reports layout as a replacement to the legacy report parameter pages by altering the Sunflower parameter settings in the Administration Module.

Information and specifications are subject to change without notice.
