SunflowerSystems
Asset Management Solutions

A Revolutionary Concept: A Free IUID Solution

Sunflower UID empowers organizations to comply with the DoD requirements for unique identification. With the Sunflower UID you will have the ability to:

- Generate a compliant Unique Item Identifier (UII), ensuring uniqueness
- Print labels
- Produce files to upload to the IUID registry in approved file formats

Generating UIIs, 2-D Marks, and Compliant Labels

Once IUID items are identified, the next challenge is to determine the format of the UIIs, the 2-D marks, and the compliant labels. Sunflower UID provides organizations with the flexibility to identify multiple formats based upon the needs of multiple business units within an organization, while providing the end-user with a simple wizard to generate the UIIs, 2-D marks, and compliant labels.

- Supports Construct 1 and 2 as well as alternative UIIs
- Generates 2-D marks
- Allows creation of compliant labels that can be designed for your organization
- Generates labels from Sunflower using Zebra Printing Language (ZPL) protocol or a file can be provided to outside label vendors

Uploading Information to the IUID Registry

Manually submitting information to the IUID registry is a time-consuming and tedious process. The Sunflower UID solution generates XML files in the approved formats to be transmitted to the IUID Registry. These files can be sent as often as needed per the business rules of the organization.

About Sunflower Systems

Sunflower Systems is an asset management solutions company specializing in the deployment of software tools and business processes that simplify asset management tasks. Sunflower's portfolio of solutions enables organizations to improve decision-making, accountability and regulatory compliance for all types of assets including personal property, real property, IT assets, materials, vehicles and more. Sunflower Systems offers a wide range of services including software implementation, training, consulting and operational support. Sunflower Systems has been serving the property management needs of federal agencies, universities, government contractors and national laboratories since 1997.
