

NEW FUNCTIONALITY AVAILABLE FOR MOBILE ASSET MANAGEMENT

Sunflower MobileTrak 4.6: New Functionality

Sunflower Systems is pleased to release new functionality for Sunflower MobileTrak 4.6. This exciting new functionality includes:

Mass transfers

Increase efficiency of property and office moves by recording transfers of multiple assets to new locations and new custodians in a single transaction.

Printable receipts

Print receipts as documentation for mass transfers. The receipts include signature lines for the person conducting the transfer and the person receiving the transfer. This feature is compatible with Bluetooth® enabled printers. Contact us for additional details.

Duplicate record function in asset receiving

Reduce the time necessary to perform asset receiving through the new duplicate record function. When receiving large quantities of the same asset, the duplicate record function will allow you enter the catalog and organization information only once. For all subsequent records, simply scan or type the asset tag and serial number, drastically cutting the time to enter each record.

Option to exclude reference data when sending data to the scanner

Alleviate security issues and minimize download times by removing reference data when sending data to the scanner. Excluding reference data means that the scanner will contain no organization, people, location or catalog information.

Sunflower MobileTrak 4.6: Additional Hardware Option

In addition to the new functionality, Sunflower MobileTrak 4.6 is now available on the new Intermecc™ CN3 scanner. Advantages of the Intermecc™ CN3 scanner include:

- Lighter weight
- Smaller size
- Improved keyboard layout
- More efficient scanning

Note: Sunflower MobileTrak is also available on the existing Intermecc™ 41B scanner.

Sunflower MobileTrak can be downloaded from our Customer Care site. If you have any questions please do not hesitate to contact us at info@sunflowersystems.com.
