Sunflower Solutions

Sunflower Systems® offers a solution to meet the needs of the Healthcare industry by tracking high value medical and scientific equipment and items that range from highly mobile mission critical to items that are used on a daily basis. The Sunflower Enterprise Asset Management Solution is designed to increase physical and financial accountability for assets as an outcome of your everyday processes.

Healthcare Asset Management

Managing hospital property and scientific equipment from acquisition through disposal involves a unique set of challenges. Sunflower Systems offers an integrated software suite that provides healthcare and hospital property managers the ability to monitor, control and account for all property transactions.

- ◆ Track personal property such as microscopes, oscilloscopes and imagers that can be assigned to several levels of organizations and people at the same time. Transfer location and accountability between them and record ongoing events such as calibration, maintenance and performance tuning.
- ◆ Issue, return and transfer supplies and assets such as surgical gloves, wheel chairs and medical kits between stock locations with commodity tracking functionality.
- ◆ Manage capital asset requirements for personal and real property. Sunflower Systems will automatically create journal transactions for capitalization, reclassification, depreciation and disposition. These entries can be then be viewed on screen, displayed through various reports and/or interfaced to your financial system for posting.
- ◆ Initiate agreements to track your leases, warranties, research projects and grants for internal and external reporting requirements.
- ◆ Simplify physical inventory, receiving, shipping, and excess management processes by bringing your asset data to a handheld device.

Take control of your healthcare asset management tasks with Sunflower System's software tools:

- ◆ **Sunflower Assets®**
Manage physical and financial accountability in a single web-based system. Property activity is easy to record, simple to retrieve and completely auditable.
- ◆ **Sunflower MobileTrak**
Get faster and more accurate physical inventory results with our handheld scanning solution. Streamline the receiving process and increase accountability by capturing item information on a mobile device at the point of delivery. Easily record multiple identifiers (linear barcode, 2-D data matrix, RFID) to individual assets in the field.
- ◆ **Sunflower ExcessTrak®**
Improve and simplify excess asset pickup, lot management and disposal with our integrated mobile excess software.
- ◆ **Sunflower PackTrak**
Increase accountability for assets in transit by scanning your assets as they are packed, shipped, received and unpacked.

Our Customers

Current customers in the healthcare related industry that are using Sunflower Assets for managing property include:

- ◆ Stanford University
- ◆ National Institutes of Health
