Managing the full asset lifecycle is a complex process. There are many challenges to the effective management, control and use of property. Asset managers are required to maintain accountability in environments that challenge them daily with decentralized receiving, changing regulations, multiple acquisition methods, advances in technology, variable demand, business unit reorganizations and the transfer and deployment of large quantities of assets to the field.

Sunflower Systems simplifies asset management by providing software tools and business solutions to increase accountability and gain regulatory compliance as an outcome of everyday tasks. Sunflower Assets® is the premier software solution for tracking physical and financial accountability for all assets from acquisition through disposal. Sunflower Assets is a web-based lifecycle asset management system designed to address local as well as global asset management challenges for federal agencies, commercial organizations, universities, research laboratories and state and local governments.

Benefits of Sunflower Solutions

Sunflower Assets provides organizations with:

- ◆ Increased asset utilization
- ◆ Reduced costs
- ◆ Auditable financial information
- ◆ Compliance with internal and external regulations
- ◆ Support for internal controls audit (SOX and A-123)
- ◆ Access to your asset information world wide
- ◆ Better information for decision making
- ◆ Environmental awareness
- ◆ Integrated enterprise systems
- ◆ Standardized business processes
- ◆ Access to your data in the field on handheld barcode scanners

Managing the Asset Lifecycle with Sunflower

Sunflower Assets enables property managers to monitor, control and account for property transactions. Sunflower Assets accounts for all types and classifications of property including personal and real property, material, capital, sensitive, IT assets, vehicles, weapons, scientific equipment, uniforms, parts, tools and more.

Additionally, Sunflower's integrated mobile solutions for receiving, physical inventory, shipping, and excess management simplify property processes by bringing your asset data to a handheld device. Sunflower Assets enables you to:

- ◆ Manage every asset from acquisition through disposal
- ◆ Capture all location, organization, custodian, user and value changes
- ◆ Record maintenance events for each asset or groups of assets
- ◆ Manage warranties and leases
- ◆ Track who, what, when, where and why for every asset

Sunflower Support of the Asset Lifecycle

History: Review a perpetual history record of every transaction for each asset. Auditable summary and detail level information displayed with a username and time stamp for each transaction.

Reporting: Report on current asset information, look back at a single point in time or trend the changes to your assets over time.

Financial Information: Complete and auditable history of financial of events (capitalization, value increases or decreases, depreciation and write-off) from obligation of funds through asset disposal.

Take control of your asset management tasks with Sunflower Systems software:

Sunflower Assets®

Manage physical and financial accountability in a single web-based system. Property activity is easy to record, simple to retrieve and completely auditable.

Sunflower MobileTrak

Get faster and more accurate physical inventory results with our handheld scanning solution. Streamline the receiving process and increase accountability by capturing item information on a mobile device at the point of delivery. Easily record multiple identifiers (linear barcode, 2-D data matrix, RFID) for individual assets.

Sunflower ExcessTrak®

Improve and simplify excess asset pickup, lot management and disposal with our integrated mobile excess software.

Sunflower PackTrak

Increase accessibility for assets in transit by scanning your assets as you pack, ship, receive and unpack them.

About Sunflower

Sunflower Systems is an asset management solutions company specializing in the deployment of software tools and business processes to simplify asset management tasks. Sunflower's portfolio of solutions enables organizations to improve decision-making, accountability and regulatory compliance for all types of assets including personal property, real property, IT assets, classified equipment, materials, weapons, vehicles and more. Sunflower Systems offers a wide range of services including software implementation, training, consulting and operational support.
