SunflowerSystems
Asset Management Solutions

Lifecycle Asset Management

Managing the property lifecycle from acquisition through disposal is challenging. Sunflower Systems offers an integrated software suite that provides property managers the ability to monitor, control and account for all property transactions. Sunflower's mobile solutions for receiving, physical inventory, shipping, and excess management simplify property processes by bringing your asset data to a handheld device. Take control of your asset management tasks with these software tools:

- ◆ **Sunflower Assets®**
Manage physical and financial accountability in a single web-based system. Property activity is easy to record, simple to retrieve and completely auditable.
- ◆ **Sunflower MobileTrak**
Get faster and more accurate physical inventory results with our handheld scanning solution. Streamline the receiving process and increase accountability by capturing item information on a mobile device at the point of delivery. Easily record multiple identifiers (linear barcode, 2-D data matrix, RFID) to individual assets in the field.
- ◆ **Sunflower ExcessTrak®**
Improve and simplify excess asset pickup, lot management and disposal with our integrated mobile excess software.
- ◆ **Sunflower PackTrak**
Increase accountability for assets in transit by scanning your assets as they are packed, shipped, received and unpacked.

Government Property Management

Managing government property brings with it great responsibility. Sunflower Contract Reports enables contractors to maintain and report on government assets from a single web-based system. It automatically generates standard government forms such as DD1149 and DD250 and financial reports including NF1018 and DD1662. Property Managers can identify, generate, print and upload asset information to the Department of Defense IUID registry. Ensure compliance with FAR Part 45 and other Federal regulations with:

- ◆ **Sunflower Contract Reports**
Provides regulatory compliance as an outcome of everyday property management activities.

Real Property Management

Real property requirements differ greatly from those for personal property. Sunflower Assets® Real Property module captures data elements that are unique to real property. These elements are essential for audit tracking, reporting and compliance with Executive Order 13327. Take control of your real property asset management tasks with:

- ◆ **Sunflower Assets®**
Track the necessary attributes for accurate real property inventories from a single system.

Physical Inventory

Conducting a physical inventory can be time consuming and expensive. Sunflower provides the ability to perform multiple types of inventories including wall to wall, scan and validate, and inventory by exception. Sunflower simplifies the physical inventory process whether assets are located in one building,

across town, or across the world. It tracks and manages assets using various tagging methods such as bar codes, UID and RFID tags. Sunflower generates real-time reports that provide key inventory metrics like overages, shortages, percent complete and inventory accuracy. Confidently perform physical inventories with:

- ◆ **Sunflower Assets®**
Manage and report on all aspects of your physical inventory.
- ◆ **Sunflower MobileTrak**
Get faster and more accurate physical inventory results with our handheld scanning solution.

Data Security

Protecting sensitive data from theft requires an innovative approach to information security. Managers need to be able to identify the assets that present the greatest information security risk, control assets and employee compliance with information security policy and certify the complete removal of sensitive data from devices prior to disposal. Reduce the risk of losing sensitive data with:

- ◆ **Sunflower Aware**
Protect data at rest by identifying the assets that present the greatest information security risk.

Enhanced Check-In/Check-Out Control

Classified assets or assets that have specific handling requirements need additional control. Sunflower Sentry easily allows the check-in and check-out of assets such as electronic media, documents, parts, specialized tools, weapons and more. Confidently manage sensitive assets with:

- ◆ **Sunflower Sentry®**
Manage the short-term transfer of controlled assets to authorized individuals.
