SUNFLOWER SYSTEMS AND RF CODE ANNOUNCE PARTNERSHIP

ARLINGTON, VA – Sunflower Systems, the leader in asset management software and solutions, announces a partnership with RF Code, the leader in active RFID-based solutions for asset tracking, environmental monitoring, personnel tracking, asset security, inventory optimization and process efficiency.

The partnership calls for integrating RF Code’s real time active RFID capabilities into Sunflower’s asset management platform. It provides Sunflower customers the ability to find, track and monitor in real-time their active RFID tagged assets as part of the Sunflower solution. Customers will have instant inventory visibility and exception alerting in situations such as asset location changes, changes in environmental conditions and room and data center rack access.

The partnership provides a complete asset management solution to corporate, university and government end-users.

“Sunflower Systems is excited to provide our customers a fantastic line of RF Code products that will help them achieve the next level of asset accountability. The partnership between RF Code and Sunflower Systems provides the most advanced asset tracking and Enterprise Asset Management capabilities available in the market. The solutions provided through our partnership will enable organizations to use real time information to make better business decisions, increase visibility and reduce costs.” – Jeff Polyak, Sunflower Systems VP of Solutions

“Our partnership with Sunflower Systems puts us in good company. Sunflower is known as the leading provider of asset management solutions” said Peter Sola, Vice President Business Development, RF Code. “We share a common drive to help our customers reduce their operating costs across the enterprise. The integration of our real time technology into their asset management platform further extends a customer’s ability to simplify a traditionally complex task. By automating asset tracking to reduce the time and cost of tracking critical assets, our two companies are helping organizations increase asset utilization, reduce physical inventory process costs and optimize the overall lifecycle asset management process.”

About Sunflower Systems

Sunflower Systems is an asset management solutions company specializing in the deployment of software tools and business processes to simplify asset management tasks. Sunflower’s portfolio of solutions enables organizations to improve decision-making, accountability and regulatory compliance

for all types of assets including personal property, real property, IT assets, materials, vehicles and more. Sunflower Systems offers a wide range of services including software implementation, training, consulting and operational support. Sunflower Systems has been serving the property management needs of federal government agencies, universities, government contractors and national laboratories since 1997. The company has offices in San Ramon, California and Arlington, Virginia. For more information, please call 866-209-3516 or visit our website at www.sunflowersystems.com.

About RF Code

RF Code automates the ability to discover, track and monitor high-value physical assets across the enterprise. Using the company's award-winning platform for active RFID, customers know instantly and on demand the precise location of each individual asset. This spares them the high cost, time intensity, and compliance risk of a manual inventory. RF Code and its world-class roster of global partners develop solutions used in demanding industry environments including IT, healthcare, defense, pharmaceutical, manufacturing, transportation and homeland security. <http://www.rfcode.com>
