UNITED SPACE ALLIANCE SELECTS SUNFLOWER SYSTEMS FOR GOVERNMENT PROPERTY MANAGEMENT SOLUTION

ARLINGTON, VA – Sunflower Systems®, the leader in enterprise asset management software and solutions, announces United Space Alliance® has selected Sunflower Systems to be their government property management system of record. USA is NASA's primary Space Shuttle contractor and also supports International Space Station operations.

Sunflower's integrated software suite provides USA with the ability to monitor, control and account for all transactions related to contract property in a single web-based system, with appropriate, scalable safeguards to protect sensitive data. The Sunflower solution is designed to support government property management including: compliance with FAR part 45; acquisition, use and disposal; the DoD IUID initiative; NASA and DoD financial reporting; and audit preparation and support. Through the use of integrated mobile solutions, USA property managers can also support the receiving of new property, physical inventory of both new and existing property, verify property data and facilitate the excess process through the use of handheld scanners.

"We are very excited to have United Space Alliance as a client. They join an increasing number of government contractors which demand more than just an asset management database, but the expertise of our NPMA certified professional services group to assist in optimally configuring the solution to their business processes to achieve compliance, cost savings and new asset management efficiencies", says Naeem Raza, CEO Sunflower Systems.

About Sunflower Systems

Sunflower Systems is an enterprise asset management solutions company specializing in the deployment of software tools and business processes to improve asset management operations. Sunflower's portfolio of solutions enables organizations to reduce costs, improve decision-making, accountability and regulatory compliance for all types of assets. The Sunflower solution suite also includes scanners, mobile PC's, asset labels, RFID technologies and a wide range of services including software implementation, training, consulting and operational support. Sunflower Systems supports the property management needs of federal government agencies, universities, government contractors, national laboratories and corporations from offices in San Ramon, California and Arlington, Virginia.
