

NEWS RELEASE

SUNFLOWER UNVEILS FREE UID SOLUTION

Sunflower Systems® launches Sunflower UID, a free UID solution for organizations that are required to comply with the Department of Defense (DoD) UID mandate.

ARLINGTON, Virginia. July, 2008 – Sunflower Systems®, the leading provider of asset management solutions and software, announces the release of Sunflower UID, a completely free solution to help organizations comply with the DoD requirement for unique identification. Sunflower UID is standalone web-based software provided by Sunflower Systems and does not require the purchase of any software or services to meet your organizations UID requirements.

Sunflower UID enables users to generate a compliant unique item identifier (UII), print labels and produce files to upload to the IUID Registry in approved file formats. Sunflower uses a simple wizard to generate the UIIs, 2-D marks and compliant labels. Manually submitting information to the IUID Registry is a time-consuming and tedious process. Sunflower UID simplifies the process by producing XML files that can be transmitted to the registry.

Jeff Polyak, VP Solutions, states, “One of the goals woven through all of our solutions is to provide regulatory compliance as an outcome of everyday asset management activities. Sunflower Systems is a strong supporter of the UID program. As a provider of software tools, we believe the best way we can demonstrate our support of the UID program is to provide free web-based software that maximizes the community’s ability to comply with UID requirements. With the UID initiative growing every day, we believe this is a great opportunity to provide the asset management community with the tools to achieve UID compliance and experience the Sunflower difference without a need to purchase software or services. Asset managers that work with Sunflower, stay with Sunflower. This is an opportunity for Sunflower to meet more of you in the community, provide you with a helpful compliance tool and support the UID initiative in the most meaningful way we can.”

The free solution can be downloaded at www.sunflowersystems.com.
