SRC SELECTS SUNFLOWER SYSTEMS FOR ASSET MANAGEMENT SOLUTION FOR COMPANY AND GOVERNMENT PROPERTY

ARLINGTON, VA – Sunflower Systems®, the leader in enterprise asset management software and solutions, announces SRC, Inc. has selected Sunflower Systems to manage their company and government assets. SRC is a nationally recognized, research and development company with more than 50 years of experience in defense, environment and intelligence.

Sunflower’s integrated software suite provides SRC with the ability to monitor, control and account for all transactions related to company and contract property in a single web-based system, with appropriate, scalable safeguards to protect sensitive data. SRC plans to integrate Sunflower data with their Deltek Costpoint® application to achieve new efficiencies. Further, Sunflower provides SRC with a tool designed to support government property management including: compliance with FAR Part 45; acquisition, use and disposal; DoD financial reporting; audit preparation and support and the DoD IUID initiative. Specifically, Sunflower’s fully integrated IUID functionality will enable SRC to create UIIs based upon any construct, create 2D marks, verify marks, print 2D labels and generate files for upload to the IUID Registry or Wide Area Work Flow (WAWF).

“We are thrilled to be working with SRC as for more than 50 years they have been dedicated to delivering solutions focused on keeping America safe and strong. Many government contractors need the ability to have both company and government assets in a single solution in order to achieve cost reductions and streamlined business processes. We’re excited to help SRC reach their goal while providing the tools and assisting in the development of procedures which will also facilitate compliance to government accounting regulations”, says Naeem Raza, CEO Sunflower Systems.

About Sunflower Systems

Sunflower Systems is an enterprise asset management solutions company specializing in the deployment of software tools and business processes to improve asset management operations. Sunflower’s portfolio of solutions enables organizations to reduce costs, improve decision-making, accountability and regulatory compliance for all types of assets. The Sunflower solution suite also includes scanners, mobile PC’s, asset labels, RFID technologies and a wide range of services including software implementation, training, consulting and operational support. Sunflower Systems supports the property management needs of federal government agencies, universities, government contractors, national laboratories and corporations from offices in San Ramon, California and Arlington, Virginia.
